## New RTK Network Package Employs Existing Networks

ENGLEWOOD, Colo. — Farmers now have a new, cost-effective way to implement RTK accuracy in their operations. Leica Geosystems announced its new RTK Network Package that will allow farmers in established Leica and Trimble® reference network locations to upgrade to RTK accuracy for just \$8,990.

The package includes Leica's mojoRTK Console, an 8-mile range upgrade and an unlock code that allows the console to communicate with established third-party RTK networks. The package price does not include a network radio, which can be purchased separately from a local reseller.

"The new price points available for the same RTK accuracy farmers have come to expect is really changing the precision ag landscape," said Trevor Mecham, North American business manager. "Plus the open architecture of our system allows farmers to pick and choose hardware and software options that fit their needs and their budgets."

The RTK Network Package will only be available through Leica Geosystems Premium Resellers, but will provide a very cost-effective solution for farmers ready to upgrade their equipment to operate with RTK accuracy.

## Leica Geosystems – when it has to be right

Leica Geosystems' agriculture applications build on the company's experience in its growing GPS and machine automation business, which already benefits the survey, construction and mining industries worldwide. The Denver, Colo., agriculture service and sales office is managed by auto-steer company veterans with a proven commitment to innovation based on solid economic returns for farmers.

Those who use Leica products every day trust them for their dependability, the value they deliver, and the superior customer support. Based in Heerbrugg, Switzerland, Leica Geosystems is a global company with tens of thousands of customers supported by more than 2,400 employees in 22 countries and hundreds of partners located in more than 120 countries around the world. Leica Geosystems is part of the Hexagon Group, Sweden, a US \$5.5 billion company.
